Converge® Multi-Cook Oven

CE

Converge® Multi-Cook Ovens combine the flexibility of a multicook oven, power of Structured Air Technology®, and the versatility of combi cooking in each oven chamber. Controlled humidity to execute an all-day menu and boost production capacity. Increase production capacity without increasing labor. Two or three independent ovens in one give you the freedom to steam, air fry, bake, grill and more at the same time without flavor transfer—all in a ventless, self-cleaning design.

Control the temperature, fan speed, humidity level and cook time in each individual oven chamber.

Exclusive Structured Air Technology® delivers focused heat for faster, more even cooking and consistent, high-quality results.

Reduce labor by eliminating extra steps in food production and the need to watch and rotate pans.

An advanced control—designed intentionally simple—features an intuitive, user-friendly interface and programmable recipes to ensure consistency with each cook.

ChefLinc™, cloud-based remote oven management software, streamlines processes and maximizes profits with data-driven insights (deluxe control only).

ISO 9001:2015-certified.

Standard features

- Three cooking modes—steam, convection, and combination
- Single-point probe on Deluxe control models
- Programmable, touchscreen control
- Easy recipe upload/download via USB port
- Four fully automated cleaning cycles
- Integrated catalyst wash
- Front-accessible and retractable rinse hose
- LED illuminated door handle is designed for the needs of the busy kitchen, and provides visual notification of the oven status
- Absolute Humidity Control™ allows for selection any humidity level from 0-100% to maximize food quality, texture, and yield
- EPA 202 compliant

Water requirements (per oven)

- Two cold water inlets drinking quality
- One treated water inlet: 3/4" NPT male connection. Line pressure 200 kPa minimum dynamic and 600 kPa maximum static at a minimum flow rate of 0.6 L/min.
- One untreated water inlet: 3/4" NPT male connection. Line pressure 200 kPa minimum dynamic and 600 kPa maximum static at a minimum flow rate of 15 L/min.
- Water drain: 40mm connection with a vertical vent to extend above the exhaust vent. Materials must withstand temperatures up to 93°C.
- Water supply connections to be 3/4" NPT male fittings.

Water Quality Standards

Inlet Water Requirements

It is the sole responsibility of the owner/operator/purchaser of this equipment to verify that the incoming water supply is comprehensively tested and, if required, a means of "water treatment" provided that would meet compliance requirements with the published water quality standards shown below. Non-compliance with these minimum standards will potentially damage this equipment and/or components and void the original equipment manufacturer's warranty. Alto-Shaam recommends using the Alto-Shaam Reverse Osmosis System to properly treat your water.
